I zDryer (submenu item)		
[Header] Finally, where quality and beauty meet.		
Features		Product Images
[Introduction] zDryer is a state-of-the-art, fully automatic, electric, warm-air hand dryer that operates with a touch-less sensor when activated by positioning hands below the nozzle.		
photo	<p><b>Energy Efficient</b></p> <p>It's not enough just to say it saves you money. zDryer will well-exceed your expectations of energy efficiency. It's a new, hybrid, low-consumption hand dryer with only a 1560-watt electrical system.</p> <p>The new internal design allows for a smaller heating element, requiring less power, which in-turn leaves operational costs low – all without compromising performance!</p>	
<p><b>Internal Innovation</b></p> <p>With the newly innovated internal structure, the sensor and heating element are placed right at the nozzle, providing warmth right away – without negatively effecting the motor's temperature as in other electric hand dryers. This not only saves energy, but means even a longer motor life and safety from electrical fires.</p>		photo Show heating element diagram
photo	<p><b>Super Fast</b></p> <p>zDryer took the next step up from the standard electric hand dryers, and designed the motor housing to be made from one piece – specifically structured to prevent air loss and speed. As more cracks are eliminated, less air can escape through the system itself, which keeps the pressure strong and noise level much lower than other standard hand dryers.</p>	

<p><b>Touch Free</b>  This fully-automatic, electric, warm-air hand dryer operates with a touch-less sensor when activated by positioning hands below the nozzle. It turns on when hands are present and shuts off a second after they are gone. People's need for sanitary equipment and clean environments is ever so needed as now, and there is no need to keep the hand dryer running at your expense long after there is no one there.</p>	<p>photo</p>
<p>photo</p>	<p><b>Hardwire or Plug-in Ready</b>  zDryer is smaller in size than standard hand dryers, and has the added feature of hardwire or plug-in ready use, even for the unlikely of spaces. No need to worry about special wiring as its low-consumption will fit most standard outlets.</p>
<p><b>Stainless Steel</b>  This isn't your average metal or aluminum cover. This is a beautiful, 16-gauge stainless steel appliance with 18/10 chromium nickel, lasting a lifetime with no rust. <i>Finally, where quality and beauty meet.</i> This is an appliance you never thought would look so good.</p> <p>Now offered in three different finishes, so there is no excuse for not buying zDryer - because zDryer will match any of your designs.</p>	<p>photo</p>
<p>photo</p>	<p><b>Pleasant</b>  We didn't just think about helping you save on your electric bill, we also thought about the need to be more efficient in drying time and comfort. zDryer comfortably blows warm air and contains two filtration systems. Smart filtered air technology blows clean air and even sounds quieter.</p>
<p><b>Safety</b>  A neat feature that most other hand dryers don't include, is that the opening is shielded and out of reach for the safety of children and even adults. There is no need to worry about anyone being able to stick their fingers in the socket.</p> <p>And the safety of the machine's operation is also at its best. The motor does not heat up from the heating element, thus meaning an even longer motor life and safety from electrical fires.</p>	<p>photo</p>
<p>photo</p>	<p><b>Effortlessly Efficient</b>  With the newly organized internal system, the hand dryer is much more powerful and still economical. <i>And it's not just about being green,</i> it's also about saving you thousands of dollars in restroom management. Compare the savings to find out how much it can benefit you.</p> <p>&gt; Compare Now</p>
