Hello Alex,

As we discussed before, release planned to feb. 19.

Also our Quality assurance engineer has few questions about elements places, to be sure that everything is right. Please check this points.

Are these buttons necessary:

1 'Log in' on right side?

2 'PayPal' logo on product and category pages? (i think i is not needed, because we do not use any payment methods)

3 'Add to compare' on product page? and "mail to friend" (mail friend function available only for registered users)

4 Should be displayed downloaded files on pop up 'quick view'?

5 What does it mean 'Move on the bottom' in screenshot? Move only block 'related product' or all right column (related product,recently viewed products, paypal)

On one of the screenshots you asked to Move block with related products to the bottom.

I see 2 options how we can do this: please see 2 screenshots and inform me which do you prefer

option 1

is so we just will place related products in the same column under other elements

Wilson Men's Body Mapping Polo

You can always contact our wonderful

2 option

- delete all elements from the right column,
- move related products to the bottom of the page,
- increase width of the product column, so page will have 1 column layout

thanks in advance,
