Generate Printable PDF book: Starting process

The screenshot displays the LINKAVIE application interface. The top navigation bar includes a search bar, a user profile icon, and a menu icon. The sidebar on the left contains a table of contents for the document 'La conquête de l'espace'. The main content area shows the document title 'La conquête de l'espace - La navette spatiale' and its content, which includes a paragraph about the American space shuttle, a large image of the shuttle in flight, and a list of archive documents. Annotations with arrows point to the 'select' button in the top navigation bar and the 'Generate a printable book' button in the sidebar.

1/ Click on select

2/ Add a button: « Generate a printable book »: User clicks on it

La conquête de l'espace - La navette spatiale

Data Assigned: 1 January 1971 - 9 March 1981

La navette spatiale américaine (en anglais Space shuttle ou Space Transportation System, STS) est une navette spatiale conçue et utilisée par l'agence spatiale américaine (NASA) dont le vol inaugural remonte au 12 avril 1981 et qui a été retirée du service en juillet 2011 après avoir effectué 135 vols. Elle est composée de trois sous-ensembles : l'orbiteur, qui est le seul composant à se placer en orbite, transporte le fret et les astronautes, le réservoir externe, et deux propulseurs d'appoint. Le terme navette spatiale est un raccourci souvent utilisé pour désigner le seul orbiteur. L'orbiteur et les propulseurs d'appoint sont réutilisables. L'orbiteur, qui constitue l'élément le plus complexe, a été construit à cinq exemplaires dont deux, Challenger et Columbia, ont été détruits, entraînant la perte de leur équipage

Generate Printable PDF book: Define cover type

At any time, user can go on a previous/next step

2/ Define Cover
=> We will show possible options according to the available option depending of model selected

Generate Printable PDF book: Edit page (1)

Navigate through printable album pages (1-2, 3-4, 5-6 etc..), 2 by 2.

At any time, user can save his Album in his library in a shelf called « Photobooks under construction ». A dedicated shelf that cannot be removed at bottom of all photobooks

Show the bleed, a 2mm zone all around the 2 pages that is necessary to keep as a « no content » zone, as it may be cut at printing phase.
We will show this zone and put a message « The grey border zone could be cut at when building and printing your book »

User template approach

1. User drags&drop page template (user can change again but then back to blank template)
2. User drag&drop pictures in pictures blocks of template – If picture gets a « picture description » selected, it will be added as a text block aside or below the picture (Depends of template)
3. User add text manually

User customize approach (default page)

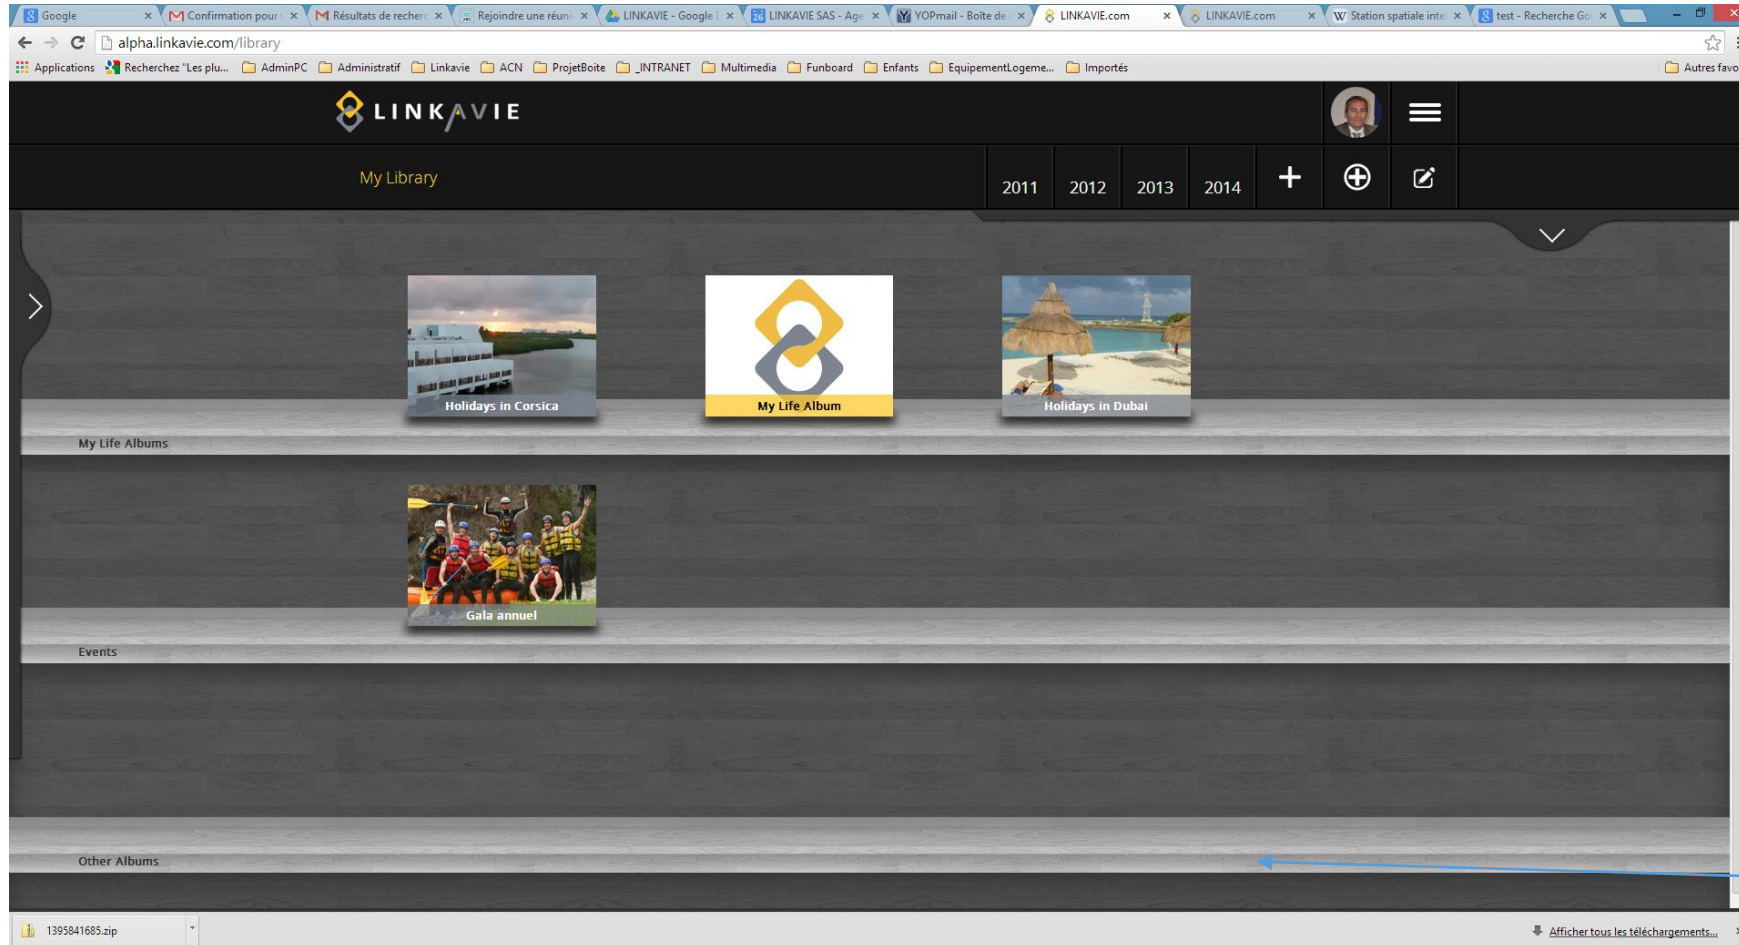

1. User drags&drop text block (may include text and pictures) in background zone :
 - This will create a new text block
 - If text block too long for the text block zone, will put RED borders with Alert
2. User drag&drop pictures in background zone: creates a standard picture block that the user can edit.

We will create and manage 6 page templates like this. We may add more templates in future. So make it simple to easily add more templates in future.

Digital album selected contents pages navigation

When an item (picture or text block) is used (draged&dropped) on the book edition, this item disappear from the digital album page zone. So that the user knows what items are used in each page, and what items are not used.

Generate Printable PDF book: Saving photobooks under constructions

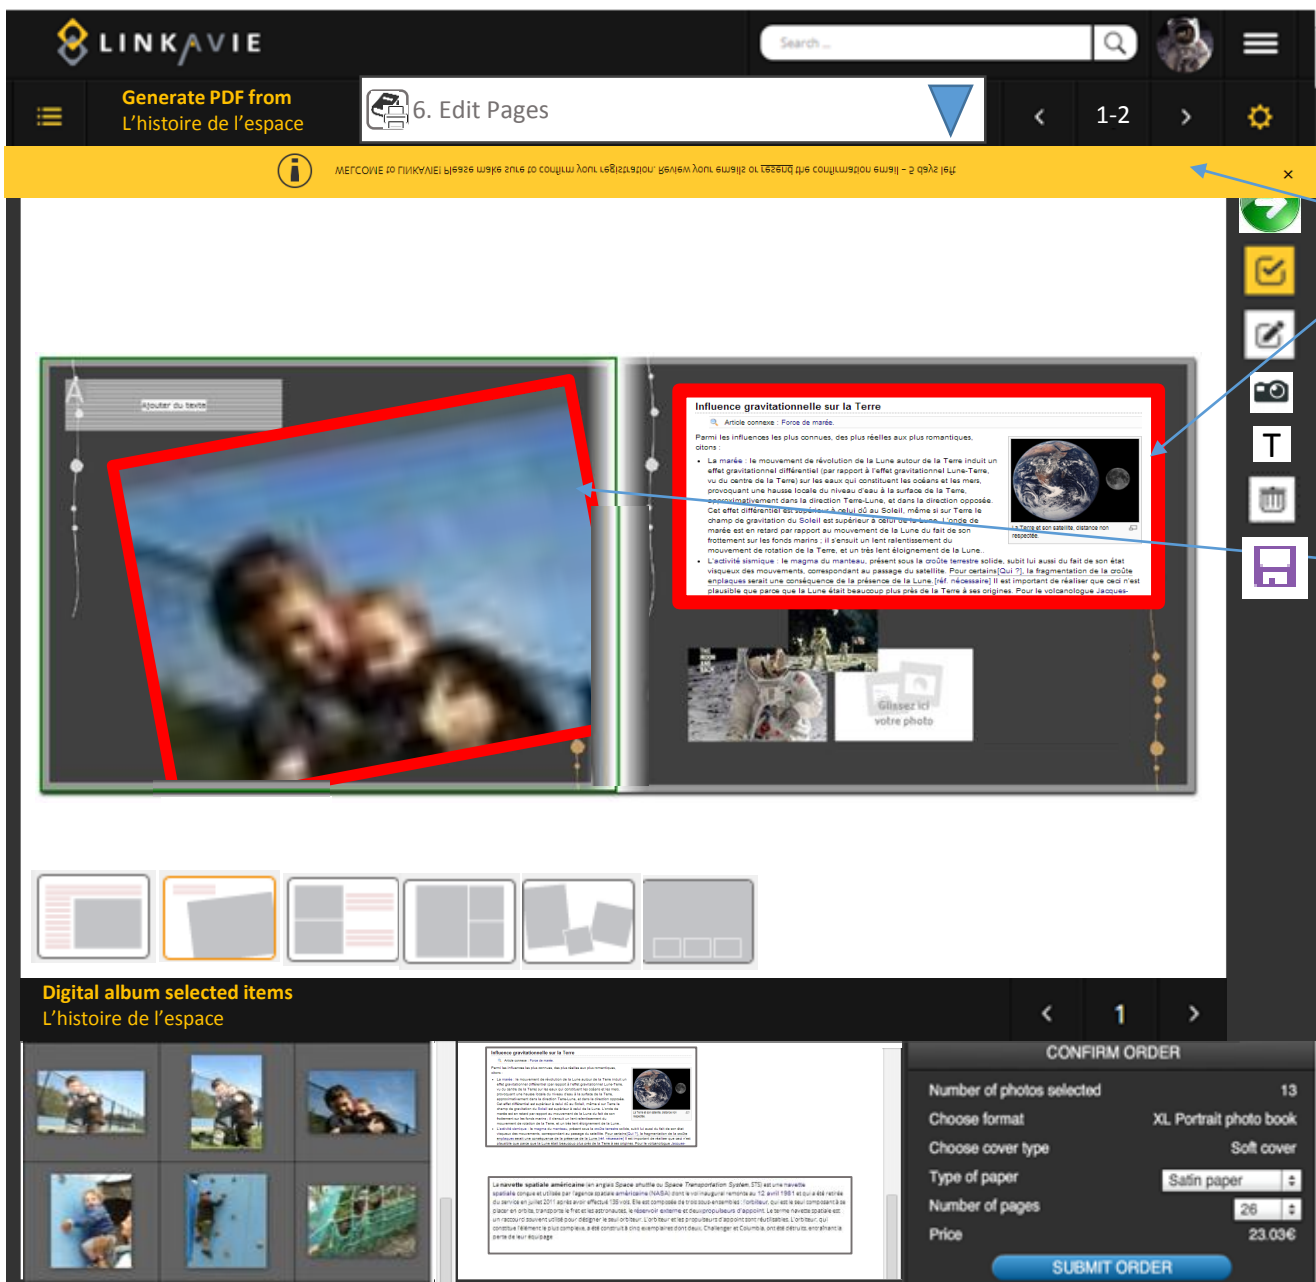

When a user click on a photobook under construction, He is brought back to the Edit book module

Dedicated shelf (not removable) at the bottom with Photobooks under construction

- 1 shelf: « Photobooks under construction » - At the bottom, cannot be removed
 - 1 shelf: « Printable photobooks » (Final PDFs) – Just above, cannot be removed
- => We will keep the final PDFs also in an editable version in the shelf « Photobooks under construction » so tht the user can go back few years later and edit a new printable book from a previous version and make a new pdf.

2 versions of generated PDF will be maintained: A lighth version, to share By email etc, and a high quality version (in back-office) for printing.

Generate Printable PDF book: Edit page (2)

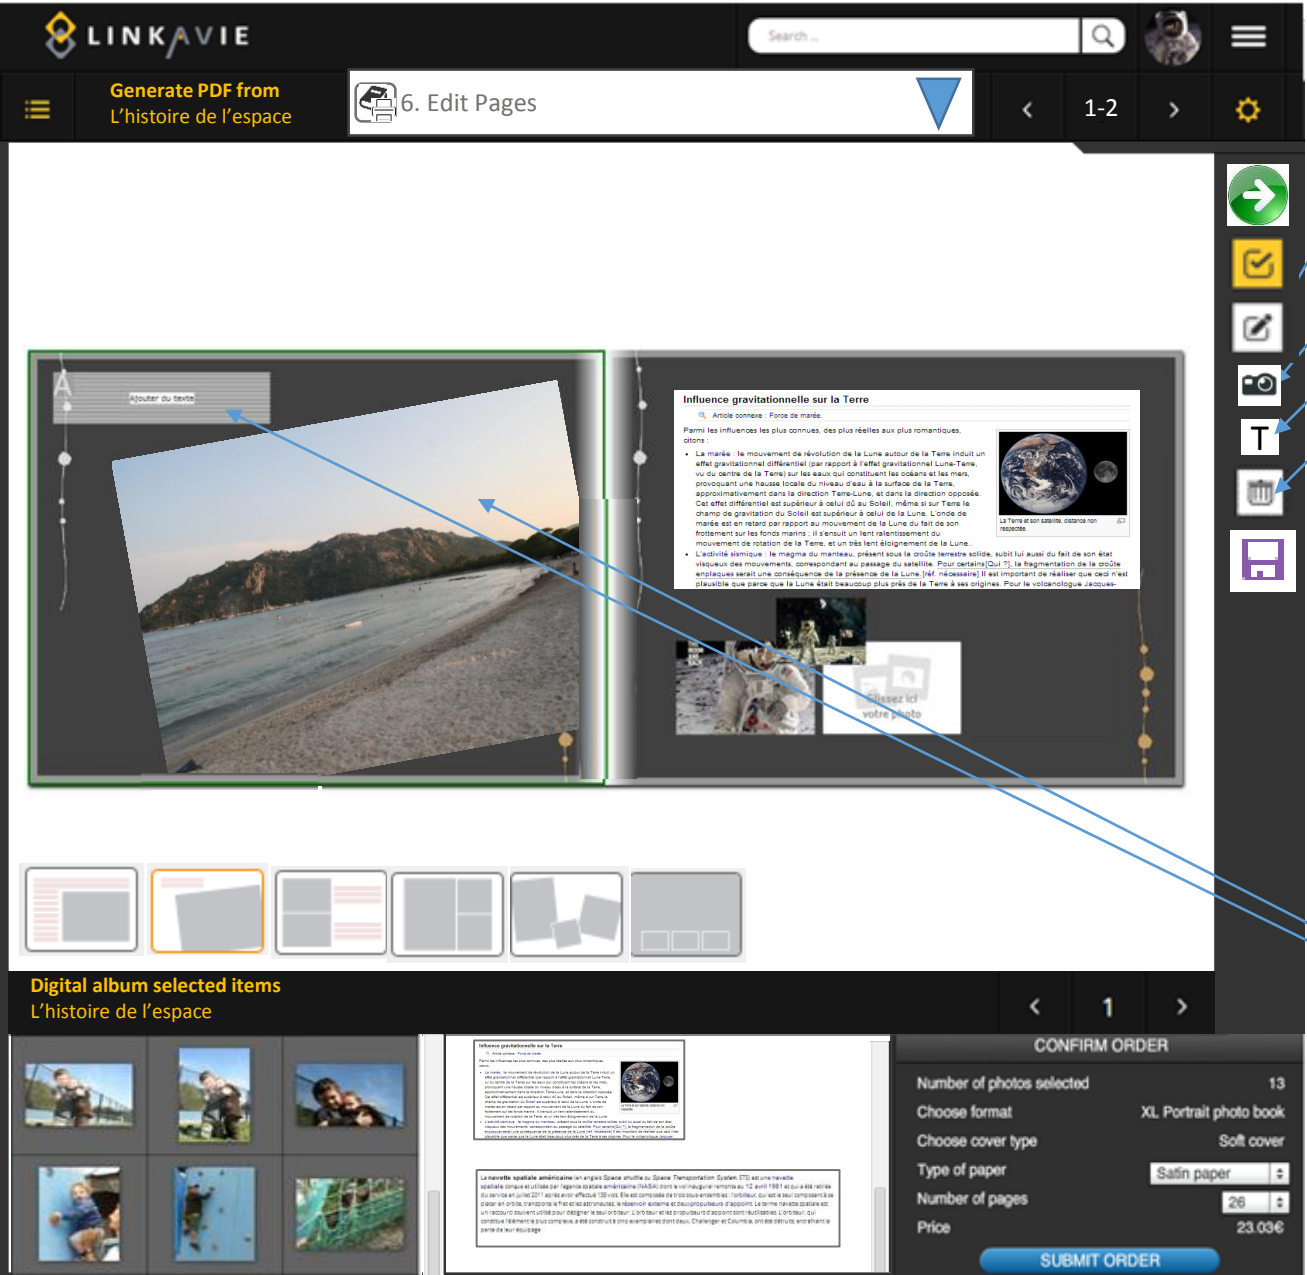

If text too long for the text block zone, will put RED borders with Alert

« Your text dont fit with the text block size. Please reduce some text, or rework your space in your page »

Rule: A text block can be arranged over a picture, but a picture block cannot be arranged over a text bloc.

If picture is too low quality for printing, RED borders + alert message « The picture resolution is too small to be printed in such a way. Please reduce the size of the picture or we recommand not to use this picture: Picture size is 430x200 px »

Generate Printable PDF book: Edit page (3)

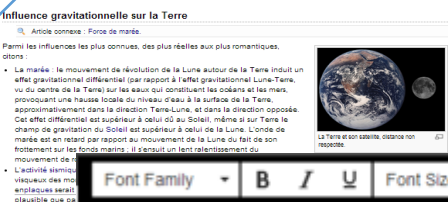

Edit selected block

Add picture block

Add text block

Delete selected block (bloc is back to its Digital album selected zone)

- Edit Text bloc:**
- Edit text with editor (same as for album text bloc)
 - Rotate block
 - Move block (from 1 page to other is ok)

- Edit picture bloc:**
- Resize picture with block (always maintain picture ratio)
 - Remove picture inside block (block not removed) => Picture is back to its Digital album selected zone
 - Rotate block
 - Move block (from 1 page to other is ok)
 - Add black or white border to the picture

Picture description comes automatically aside the picture
