☐ Allow recipients to synchronize shared content in their personal space (?)

☐ Allow recipients to share this content with other people (?)

> Share

> If checked, the recipients will be able to view, access the contents and synchronize them in their personal space. When synchronizing, the user will have all the related multimedia contents in his personal vault and library. If not checked, user will have a Read access only to your contents with no capability to synchronize the content to his personal space.

SHARING SETTINGS ? ✕

> Apply

2 additional options in the album sharing settings within LINKAVIE
- A sync button
- A share button (Share button can be turned-on only if Sync button turned-on)

« Allow share » option only if Allow Sync checked

> If checked, the recipient will have full access and permissions to the content when synchronized into his personal space and will be able to share the contents to other people.

LINKAVIE pages/chapter/album share (2): Accessing/Synchronizing

User access shared pages/album:
Select + Sync buttons appear (if sync allowed)
User selects pages, chapters or entire album to sync
User clicks on sync button:
Popup with options:

1. Sync as a new album
   - User selects shelf where to sync the album
2. Sync pages inside one of your albums
   - Then user can select 1 album among a list (From Most recent to oldest)
3. Sync method:
   - Do you want to sync videos ? (indicates the related storage capacity « of x GB available » so that user understand the impact. Youtube video should not consume storage of course. If not enough space, user can't validate.
   - If no, videos not synced

⇒ Shared pages get a unique id so that we can keep track of them (and links to pictures, video, docs unique ids)
⇒ Pages/album are synchronized into user library as a new album or inside the selected album (Chapters get organized per their date inside the existing album other chapters)
⇒ Pictures, documents and videos of the synched pages get copied into user multimedia and document vaults (contents that are not in the pages are not copied)

- Pages are flagued as « Share allowed » or « Share not allowed » so that user who synched is able or not to re-use or share those contents to others.
- Same for pictures, videos and docs that are copied into user multimedia and doc vault

When a page, chapter or album is synchronized by a Friend, the owner User gets notified by email (who, what, when...), and it appears in his dashboard activity.

# LINKAVIE pages/chapter/album share (3): Accessing/using shared content

User access his vault with shared files: File status = Share not allowed

1. User cannot share selected files with status « Share not allowed »
2. User cannot download files with status « Share not allowed »
3. User cannot Rename files with status « Share not allowed »
4. User cannot Rename/change date of folder of files with status « Share not allowed »
5. User can delete files with status « Share not allowed ». This will remove file from the related album
6. User cannot move files with status « Share not allowed »
7. User cannot use files with status « Share not allowed » in another album he would create

Not allowed for sharing files mark

This action is not allowed. Some of the selected files/pages are protected by the owner who shared this content with you

User access shared pages of a friend album after sync: pages status = Share not allowed

1. User cannot share selected pages with status « Share not allowed »
2. User cannot edit pages with status « Share not allowed »
3. User cannot Rename page with status « Share not allowed »
4. User cannot Rename/change date of chapter of pages with status « Share not allowed »
5. User can delete page/chapter with status « Share not allowed ». This will **not** remove files from the related vault
6. User can add pages/chapters to a shared album (or shared pages into a user album) with pages that have status « Share not allowed »

User access his vault with shared files: File status = Share allowed => Content become the full user property

LINKAVIE pages/chapter/album share (5): Changing sharing settings

SHARING SETTINGS ? ✕

2 additional options in the album sharing settings within LINKAVIE
- A sync button
- A share button (Share button can be turned-on only if Sync button turned-on)
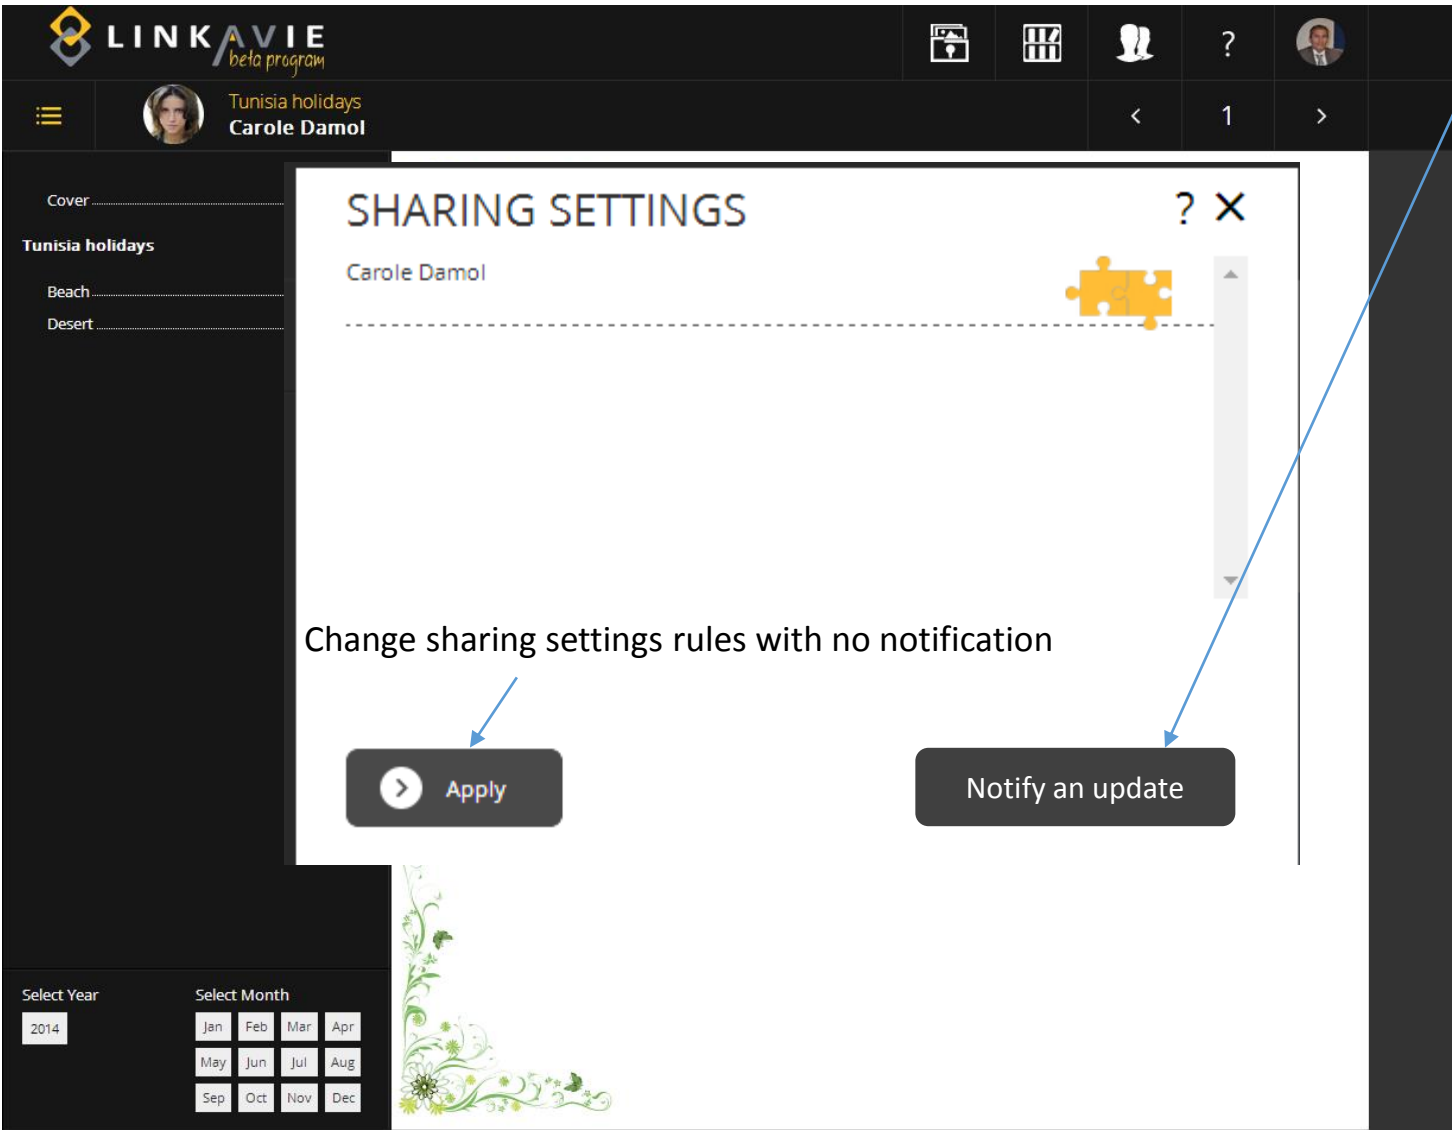

Apply

◄ 1 / 10 ►

If owner change sharing settings .
- **Check « Sync allowed » / with or without « Allow share »:** This will add the related buttons and permissions to the shared content
- **Uncheck « Sync allowed » to a user:** This will remove content from the user vault and library if he already synched and if content has not been already deleted by the user himself / No notification to user. If not synched yet, will hide the Sync button from the share

- **Keep « Sync allowed » checked but uncheck « Allow share » to a user:** This will remove the « Share » button options on shared/synched pages.

If user already shared, remove such shared content from users environment that got such shared content (related shared pages id + related files tracked by ids), if they didn't remove it yet by themsemves.

LINKAVIE pages/chapter/album share (4): When shared content is updated

If owner make updates to already shared pages the owner notifies with a special button in Sharing settings

- This sends a sharing update email for the related pages to the recipients
- They can access the updated content via their Dashboard (as today)
- They can view and sync updated content if allowed
  - **Vault contents:** We copy only additional contents / remove removed content from already shared content (vault/page)
  - **Pages**: We replace previous pages by new updated pages

« content Linkavie Share » / email share: email sent

First_Name Last_Name have shared with you on LINKAVIE ["pictures or videos from his/her multimedia vault" **OR** "documents from his/her vault" **OR** "pages from his/her album *album_name*"].

Adapt emails depending if shared content is
- "picture or videos"
- "Documents"
- Album pages

=> Same mechanism of pre-registration etc… when non LINKAVIE user for LINKAVIE share
