Unit 502, 5/F, Kwong Loong Tai Building,

1016-1018 Tai Nan West Street,

Cheung Sha Wan, Hong Kong

THINK BEFORE YOU PRINT ▪ SAVE TREES

Hello Alex,

As we discussed before, release planned to feb. 19. Good news

Also our Quality assurance engineer has few questions about elements places, to be sure that everything is right. Please check this points.

Are these buttons necessary:
1 'Log in'on right side? No Need

<2014-02-12_14-50_Home page.jpg>
2 'PayPal' logo on product and category pages? (i think i is not needed, because we do not use any payment methods) No Need

<2014-02-12_14-52_Tennis Apparel.jpg>
3 'Add to compare' on product page? and "mail to friend" (mail friend function available only for registered users) No need

<20140212-tm7v-54kb.jpg>

4 Should be displayed downloaded files on pop up 'quick view'? yes but should also start auto down load

5 What does it mean 'Move on the bottom' in screenshot? Move only block 'related product' or all right column (related product,recently viewed products, paypal)
On one of the screenshots you asked to Move block with related products to the bottom.
I see 2 options how we can do this: please see 2 screenshots and inform me which do you prefer

Option 2

option 1

is so we just will place related products in the same column under other elements

<2014-02-12_15-03_Wilson Men's Body Mapping.jpg>

2 option

- delete all elements from the right column,
- move related products to the bottom of the page,

- increase width of the product column, so page will have 1 column layout

<2014-02-12_15-07_Wilson Men's Body Mapping.jpg>

thanks in advance,
